

Therapist Portal Guide

Welcome to **InsighteCase** — your workspace for sessions, case notes, reports, scheduling, and care coordination. This guide explains what you can do in the portal and how to find your way around, step by step.

What is the Therapist Portal?

The Therapist Portal is a secure website where you can:

- Run **today's sessions** and submit **session logs** after each visit
- Work from **My Cases** — client history, observations, goals, and documents
- Draft and submit **monthly reports** for admin review
- Generate and track **invoices** for your completed work
- Set **availability**, request **leave**, and join **case manager meetings**
- Open **support tickets**, **report incidents**, and read team **memos**
- Keep your **profile** and service details up to date

Families see session updates only after you submit a log and your care team approves it for sharing. Until then, your clinical notes stay on the therapist and admin side.

Getting started

1. Activate your account (first time)

If Insighte invited you by email:

1. Open the **invite link** from your email.
2. Enter your name and choose a **password** (at least 6 characters).
3. Tap **Activate account**.
4. You will land on your **Therapist dashboard**.

2. Sign in later

1. Go to the **Therapist sign-in** page (`/therapistlogin`).
2. Enter the **email** on your account and your **password**.
3. Optional: turn on **Remember me** so you stay signed in on your device.
4. Tap **Sign in**.

Tip: Use the **Therapist** login page — not the Client or Admin pages. If you use the wrong portal, the app will ask you to sign in on the correct one.

3. Forgot your password?

1. On the sign-in page, open **Forgot password**.
2. Enter your email and follow the reset link sent to you.
3. Set a new password on the reset page.

Your sign-in email is shown on **My profile** and can only be changed by contacting support.

How navigation works

The portal is designed for **phones and computers**. The same features are available on both; only the layout changes.

On a computer (wider screen)

A **sidebar on the left** lists all main areas:

Menu item	What it is
Dashboard	Your home page — today's schedule, logs due, quick actions
My Cases	All assigned children and case workbenches
Session Logs	Start visits, submit logs, review status
Monthly Reports	Draft, submit, and track monthly case reports
Invoices	Generate and track your invoices
Support & Incidents	Support tickets, incident reports, memos
Meetings	Case manager meetings you are part of
Leave	Request and track leave
Scheduling	Set weekly availability and open slots

Open **My profile** from the sidebar footer. At the bottom you can also reach **Notifications** or **Sign out**.

On a phone (mobile)

- **Bottom bar: Today · Cases · Reports · Home** — quick access to the most-used pages.

- **☰ Menu (top left):** Opens the full menu (logs, invoices, support, leave, scheduling, profile, and the rest).
 - **Bell icon (top):** Notifications.
-

Your home: Therapist dashboard

After sign-in you arrive at your **Therapist dashboard** — a greeting with your first name and what needs you next.

The dashboard has two views:

- **Overview** — today's work, stats, and pending actions
- **Therapist Updates** — support and operational updates in one place

Here you will typically see:

Work summary tiles

Quick counts linking to the right place:

- **Assigned cases**
- **Sessions need log** — visits completed but not yet logged
- **Logs pending approval** — submitted and waiting for review
- **Report drafts** — monthly reports still in progress

Pending actions

A prioritized list when something needs you, such as:

- **Session log due** — tap to open the log for that visit
- **CM meeting notes** — follow-up after a case manager meeting

Today's schedule

Upcoming visits for today. Tap a row to open **Session logs** or the client's **case**. Use **Open session logs** → for the full logs workspace.

New case assignment

When you are assigned a new case, a banner appears. You can **start sessions and logs right away**. Optionally tap **Mark as reviewed** after you have read the care plan. If the family has not yet accepted the assignment, you may see **Waiting for parent** — you can still log sessions.

Cases needing attention

Cases flagged for overdue reports, missing logs, or other follow-ups. Tap a name to open the case, or **View all cases** → for the full filtered list.

Quick actions

Shortcut cards for frequent tasks — for example **Submit daily log**, **My cases**, **Monthly reports**, **Invoices**, **Request leave**, and **Scheduling**. The portal learns which you use most and surfaces those first.

My Cases

Menu: My Cases · **Mobile:** Cases

Your case workbench for every child assigned to you.

What you see

- **Stats** — active cases, attention needed, due soon
- **Upcoming sessions** — next visits across your caseload
- **Case cards** grouped by stage — for example active, needs attention, onboarding

Each card shows the **child name**, **case reference**, **service type**, next due item, and quick links.

Filters and search

- Search by child name or case code
- Filter by **stage**, **service type**, or **due soon**
- Sort by urgency or name
- Switch between **grid** and **table** view

Tap a case card or **View case** → to open that child's **case hub**.

Case page (your case hub)

Each assigned case has **tabs**:

Tab	What you can do
Overview	Client history, operational timeline, case manager contact, clinical snapshot (strengths, goals, and related context)
Observation	Observation checklist and reports for the case
Sessions & logs	Scheduled visits and session history for this child only
Documents	Files shared on the case — open or download

Request a status change

From the case header, use **Request change** if the case should be suspended, closed, or reactivated. This sends a request for admin approval — the case stays as-is until reviewed.

If a status request is already pending, a banner appears under the header.

Case manager

The **Case manager** card shows who coordinates this case — name, email, and a link to reach support if needed.

Session logs

Menu: Session Logs · **Mobile:** Today

This is where you **start visits**, **submit daily logs**, and track approval status. Aim to finish a log soon after each session while details are fresh.

Starting a session

At the top of Session logs you can:

1. **Start today's session** — pick a scheduled visit or a walk-in for today
2. **Log a past session** — if you forgot to log on the visit day (within allowed rules)
3. **Log child absence** — when the child was unavailable for a scheduled visit

Visit-day rule: You can only **start** a scheduled session on its **scheduled date** (today in IST). Future visits show guidance instead of a start button.

Walk-in today: For an unscheduled visit today, choose the client, session mode (Home, School, Center, Online), and actual start/end times.

Second session same day: If you already logged a session for the same child today, the portal asks **Another session today?** You can open the existing log or confirm starting another — the second log may be flagged for review.

While a session is active

An **Active session** card appears with the visit in progress. Open it to continue logging or end the session when you finish.

Submitting the log

After the visit, fill in structured sections — for example what you worked on, goals, strategies, progress signals, and the **update for family** (the message parents may see after approval).

Tap **Save draft** to continue later, or **Submit** when ready. Submitted logs move to **Pending review** until your case manager or admin approves them.

Log tabs and filters

Tab	What it shows
Needs log	Visits that happened but still need a submitted log (<i>not filtered by month</i>)
All logs	Everything for the selected month
Child absent	Absence records you filed
Leave	Leave-related log entries
Pending review	Submitted, awaiting approval
Approved	Approved logs (<i>families may see approved family-facing sections</i>)
Rejected	Sent back — open, revise, and resubmit

Use the **month and year** filter for historical tabs. **Needs log** always shows all open items regardless of month.

Edit actual times

After you submit a log, you can **Edit times** within **24 hours** of the session end if the clock times were wrong. Add a short reason when saving. The log returns to **Pending review** and may show a **Times edited** badge.

Rejected logs

Open a rejected log, read the reviewer's comments, update your entries, and **Resubmit**.

Monthly reports

Menu: Monthly Reports · **Mobile:** Reports

End-of-month summaries built from your session logs and case context.

Report pipeline

Reports move through stages such as:

- **Draft** — still editing
- **Under review** — submitted to admin / case manager
- **Published** — approved and available to the care team (and families when shared)
- **Overdue** — past the due window for that month

The page shows **attention needed**, **in progress**, and **published** sections, plus a monthly checklist to keep you on track.

Creating and editing a report

1. Open **Monthly Reports**.
2. Start a **new draft** for a case and month, or open an existing draft.
3. Review session activity for that month — you can generate draft content from logs where available.
4. Edit sections, save, then **Submit for review**.
5. If a report is **rejected**, open it, address feedback, and resubmit.

Use **case filters** and search when you manage many reports at once.

Invoices

Menu: Invoices

Generate and track payment for your completed sessions.

Typical workflow

1. Review your **session activity** for the billing period.
2. **Generate an invoice** for the chosen month (the form shows what will be included).
3. Preview the breakdown before submitting.
4. Track status — draft, submitted, approved, paid — from the invoice list.

Use the earnings summary and checklist on the page to stay current. For payout questions, open a **Support ticket** with a finance topic.

Support & incidents

Menu: Support & Incidents · **Mobile:** ☰ Menu

Three tabs:

Support tickets

For everyday questions and operational issues:

1. Choose a **request type** (HR, finance, service, scheduling, case issue, and more) so the right team receives it.
2. Select the **case / child** if relevant.
3. Write a **subject** and **message**.
4. Attach files if needed.
5. Submit — your ticket appears in the list.

On an open ticket you can **reply**, follow status updates, and close when resolved. A **policies helper** may be available for common HR or finance questions.

You can also reach support from a case page via the support shortcut.

Incident reports

For serious safety or care incidents:

- View **open** and **closed** incidents you have filed
- Tap **Report incident** to submit a new report (case, description, priority, attachments)
- Expand an incident to see status and updates from the team

Memos received

Internal memos and announcements sent to therapists — read and acknowledge when prompted.

Meetings

Menu: Meetings · **Mobile:** ☰ Menu

View **case manager meetings** where you are an attendee:

- Meeting type (observation review, IEP meeting, progress review, parent meeting, and more)
- Date, time, and duration
- **Join meeting** link when provided
- Notes after the meeting (concerns, follow-up, actions)
- **Add to Google Calendar** for scheduled meetings

Therapists may **book** certain meeting types for their cases when the portal allows it. Parent-bookable therapy sessions are managed separately under **Scheduling** and parent booking — not here.

After a meeting, complete any **CM meeting notes** tasks linked from your dashboard.

Leave

Menu: Leave · **Mobile:** ☰ Menu

Request time away and see how it affects your caseload.

Request leave

1. Tap **Request leave** (or open the form from a quick action).
2. Choose **dates** and leave **category** (paid, carry forward, unpaid, and other options your organization enables).
3. Select affected **cases** when prompted.
4. Add a **reason** and confirm whether you consulted with parents if required.
5. Submit — track status as **Pending**, **Approved**, or **Rejected**.

Leave balance

Your **balance summary** and calendar view show approved leave and remaining credits when your organization maintains balances.

When you are on approved leave, related sessions may show as **therapist unavailable** for families.

Scheduling

Menu: Scheduling · **Mobile:** ☰ Menu

Mark when you are **available** for sessions so parents and coordinators can book open slots.

Weekly calendar

- Tap an **empty cell** to add an availability slot

- Tap an existing **slot** to view, edit, or remove it
- Tap a **booked session** to jump to that case's sessions tab

Weekly schedule and recurring slots

Use **Weekly schedule** to set your regular availability pattern, or **Book recurring** for repeating open slots across weeks.

Keep availability updated when your routine changes — especially before families book new sessions.

My profile

Menu: My profile · **Mobile:** ☰ Menu → profile (via drawer footer or account area)

Keep your details accurate for coordination, visits, and HR records.

Account

- **Full name** and **phone** — edit and save
- **Login email** — read-only; contact support to change
- **Employment status** — for example Active or Suspended (*Suspended may limit new bookings*)
- **Profile photo** — upload or update your avatar

Home address

Enter your home location (address and map pin when prompted). This helps routing and service planning where your organization uses it.

Service profile

Your **service profile** — specialties, modes, and related service metadata — may be visible to coordinators. Update when your scope changes.

Reviews

Families can leave **ratings and feedback** on approved sessions. Your profile may show aggregated reviews when shared publicly.

Tap **Save** when you finish editing.

Notifications

Reach notifications from:

- The **bell** in the top bar
- **Pending actions** on the dashboard
- **Open notifications page** from the sidebar or menu

Tap a notification to open the related case, log, ticket, or meeting. Mark items read as you work through them.

Signing out

- **Desktop: Sign out** at the bottom of the left sidebar.
- **Mobile:** ☰ Menu → **Sign out** at the bottom of the drawer.

Sign out on shared devices to protect client information.

What families see (and what stays with the care team)

You enter...	Families typically see...
Full session log with clinical detail	Only approved , family-facing sections (for example “Update for family”)
Draft or pending log	Nothing yet — still in review
Rejected log you are revising	Previous approved update until a new version is approved
Monthly report draft	Nothing until published and shared
Private case notes and documents	Only files and reports explicitly shared with families

If a parent says they did not see today’s update, the log may still be **pending review** — check the log status or follow up with your case manager.

Quick reference: common tasks

I want to...	Go to...
Log today's visit	Session Logs → start session or tap from Today's schedule
Finish a log I started	Session Logs → Needs log tab, or Active session banner
Log that the child was absent	Session Logs → Log child absence
See one child's visits	My Cases → open case → Sessions & logs
Submit the monthly report	Monthly Reports → open draft → Submit for review
Generate my invoice	Invoices → Generate invoice
Request time off	Leave → Request leave
Block out availability	Scheduling → add slot or Weekly schedule
Ask HR or finance a question	Support & Incidents → Support → choose request type
Report a serious incident	Support & Incidents → Incident Reports
Join a case manager meeting	Meetings → Join meeting or calendar link
Update my phone or address	My profile → edit → Save
Flag a case for suspend/close	Case page → Request change

Tips for a smooth experience

1. **Log sessions the same day** whenever possible — **Needs log** stays manageable and families get updates sooner after approval.
2. **Use a phone in the field** — primary actions sit in thumb-friendly areas; add the site to your home screen for one-tap access.
3. **Structured fields first** — complete goals, strategies, and progress signals; use free text to enrich, not replace, structured entries.
4. **Watch pending review** — rejected or flagged logs (same-day duplicate, edited times) need a quick follow-up.
5. **Keep scheduling current** — outdated availability causes booking conflicts and support tickets.
6. **Include the case reference** in support messages so the team can help faster.
7. **Use Chrome or Safari** for the best mobile layout.

Glossary

Term	Meaning
Case	A child's active care enrollment with Insighte — your hub for sessions, reports, and documents
Case manager	Your main coordinator at Insighte for reviews, meetings, and escalations
Session log	Your record of a therapy visit — may include family-facing and clinical sections
Needs log	A completed visit waiting for you to submit the log
Pending review	Submitted log or report awaiting case manager or admin approval
CM meeting	Meeting led or coordinated by the case manager (distinct from a therapy session)
Walk-in	A session you started today without a pre-booked slot
Availability slot	A time you marked open for booking on the scheduling calendar

Last updated for InsighteCase Therapist Portal navigation and therapist-facing features. Some options (leave categories, invoice timing, meeting booking) depend on your organization's policies — contact your case manager or support if unsure.
